

ConfidenceEQ®

EQUINE APPEASING PHEROMONE GEL

US Patents: 6,077,867 & 6,384,252

DESCRIPTION

Confidence EQ® replicates the equine appeasing pheromone that mares produce as they nurse their foal. In adult horses, the presence of this pheromone is a signal that the environment is safe and secure, which can facilitate learning.

PRECAUTIONS

Avoid contact with eyes. In case of contact, flush eyes with water.
Keep out of reach of children.

PACKAGING

LIST NO.	UNIT PACKAGE	CASE SIZE
1CON011	1 (5mL) x 10 ct	54

BENEFITS

- **Helps manage stressful events** such as transportation, veterinary and farrier visits, new environments, training and competition, social situations, and clipping
- **Convenient packaging:** single-use gel packet for ease of application
- **Fast Acting,** starts working in as little as 30 minutes

ConfidenceEQ®

EQUINE APPEASING PHEROMONE GEL

US Patents: 6,077,867 & 6,384,252

DESCRIPTION:

Confidence EQ® replicates the equine appeasing pheromone that mares produce as they nurse their foal. In adult horses, the presence of this pheromone is a signal that the environment is safe and secure, which can facilitate learning.

Horses are highly sensitive to their environment and surroundings and because of this, fear is considered a normal response in the horse. Fear can be managed by teaching horses to not over-react when faced with new or unexpected stimuli such as traveling, loud and sudden noises, entering new environments, clipping or various healthcare procedures such as hoof trimming/shoeing or dental treatments.

Confidence EQ® helps horses manage new or unexpected stimuli by replicating the equine appeasing pheromone that signals an environment is safe and secure.

USES:

Confidence EQ® is recommended for horses of all ages. It is used to help build confidence in horses that are faced with new or troubling situations, including:

- Traveling/trailering, recovery after arrival
- Environmental changes: moving to a new stable, going indoors/outdoors, new owner/caretaker
- Training events, introducing new exercises
- Social situations: foal weaning, meeting new stable mates or pasture mates
- Healthcare procedures: farrier visits, veterinary visits, dental visits
- Dealing with loud noises: large crowds, thunderstorms, fireworks, gunshots, motor vehicles

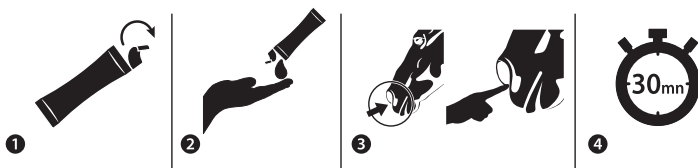

PRECAUTIONS:

Avoid contact with eyes. In case of contact, flush eyes with water.

Keep out of reach of children.

INSTRUCTIONS FOR USE:

Horse should be calm and quiet when Confidence EQ® is applied.

1. Tear open one end of the packet.
2. Expel approximately ½ of the gel on your index finger.
3. Apply the gel to the bottom edge of the horse's nostril (not too deep, or in the mucosa). Apply the remainder of the gel in the packet to the other nostril using the same procedure.
4. Administer Confidence EQ® approximately 30 minutes before the stressful situation.

Repeat the application every 2 - 2.5 hours, if necessary.

Note: As the solvent evaporates in the nostril a thin, translucent film may appear. This is considered normal and, if needed, the film can be removed by wiping with a wet sponge.

STORAGE:

Store at room temperature and away from light.

HOW SUPPLIED:

Single-Use packet containing 5mL of gel. 10 single-use packets per box.

Confidence EQ® is protected by U.S., Canadian and European patents.
US Patents 6,077,867 & 6,384,252.
